

§ 1466.6

7 CFR Ch. XIV (1–1–09 Edition)

performance. The data used in the allocation formula will be updated as it becomes available.

(b) Provide a performance incentive to NRCS in States that demonstrate a high level of program performance in implementing EQIP. Performance incentives shall consider factors such as strategically planning EQIP implementation, effectively addressing National priorities and measures and state and local resource concerns, the effectiveness of program delivery, the use of Technical Service Providers, and the number of contracts with Limited Resource Producers and Beginning Farmers. These funds will be made available annually from a reserve established at the National level when funds become available.

(c) Use NRCS's accountability system to establish state level EQIP performance goals and treatment objectives.

(d) Ensure that National, state and local level information regarding program implementation such as resource priorities, eligible practices, ranking processes, allocation of base and reserve funds, and program achievements is made available to the public.

(e) Consult with State Conservationists and other Federal agencies with the appropriate expertise and information when evaluating the considerations described in this section.

(f) Authorize the State Conservationist, with advice from the State Technical Committee and Local Work Groups, to determine how funds will be used and how the program will be administered to achieve National priorities and measures in each state.

(g) Move towards assessment, evaluation and accountability based on actual natural resource and environmental outcomes and results.

§ 1466.6 State Allocation and Management.

The State Conservationist will:

(a) Identify State priority natural resource concerns with the advice of the State Technical Committee that directly contribute towards meeting National priorities and measures and will use NRCS's accountability system to establish local level EQIP performance goals and treatment objectives;

(b) Identify, as appropriate and necessary, Designated Conservationists who are NRCS employees that are assigned the responsibility to administer EQIP in specific areas, and

(c) Use the following to determine how to manage the EQIP program and how to allocate funds within a state:

(1) The nature and extent of priority natural resource concerns at the state and local level;

(2) The availability of human resources, incentive programs, education programs, and on-farm research programs from Federal, State, Indian Tribe, and local levels, both public and private, to assist with the activities related to the priority natural resource concerns;

(3) The existence of multi-county and/or multi-state collaborative efforts to address regional priority natural resource concerns;

(4) Ways and means to measure performance and success; and

(5) The degree of difficulty that producers face in complying with environmental laws.

§ 1466.7 Outreach Activities.

NRCS will establish program outreach activities at the National, State, and local levels in order to ensure that producers whose land has environmental problems and priority natural resource concerns are aware, informed, and know that they may be eligible to apply for program assistance. Special outreach will be made to eligible producers with historically low participation rates, including but not restricted to limited resource producers, small-scale producers, Indian Tribes, Alaska Natives, and Pacific Islanders.

§ 1466.8 Program requirements.

(a) Program participation is voluntary. The applicant develops an EQIP plan of operations for the agricultural land to be treated that serves as the basis for the EQIP contract. NRCS provides participants with technical assistance, cost-share and/or incentive payments to apply needed conservation practices and land-use adjustments.

(b) To be eligible to participate in EQIP, an applicant must:
